

# QuickStart Guide

## Step 1: Turn On System

1. Press the **ON** button to turn on the projector and lower the screen.

## Step 2: Select a Source (choose one of the options below)

### Option 1: Connect with Laptop/Mobile Device (HDMI cable)

1. Connect the HDMI cable to the laptop or mobile device.  
**Note:** this may require an adapter for Apple laptops or other mobile devices.
2. Press the **LAPTOP** button on the control panel.

HDMI cable

### Option 2: Connect with Laptop/Mobile Device (VGA cable)

1. Connect the VGA cable to the laptop/mobile device.  
**Note:** this may require an adapter for Apple laptops or other mobile devices.
2. Plug the audio connector into the headphone jack on the laptop/mobile device.
3. Press the **LAPTOP** button on the control panel.

VGA cable

### Option 3: Connect with Laptop/Mobile Device (wireless)

1. Press the **Wireless Computer** button on the control panel.
2. Refer to screen for instructions on how to connect.

## Step 3: Turn Off System

1. When finished using the projector, press the **OFF** button on control panel.
